

Calibration dates 2019 for DELOLUXcontrol

In order to ensure the consistent quality of your production process, we recommend a yearly calibration of your DELOLUXcontrol UV intensity meter. Of course, we will be pleased to perform this service for you.

Please keep in mind that we have to receive your device prior to one of the listed arrival dates at the latest. Therefore, please send it to:

- ▶ **DELO Industrial Adhesives**
Equipment Service Team
DELO-Allee 1
86949 Windach
Germany

Devices that arrive after the deadline can only be considered in the next calibration period.

Please also note that, depending on the calibration volume, the run may take 3 to 4 weeks (from the respective date)!

Please take this into account in your planning.

If you have any technical questions, please feel free to contact our Equipment Service Team by calling +49 8193 9900-9612.
